

The problems Sebidri encountered at Geraalta are as follows:

On Megabit 22, 2011 (Ethiopian calendar), we held a public meeting, and people expressed their thoughts in the meeting. Soon after, the local administrative authorities began attacking the individuals who entertained ideas.

Following the incident, three leaders of Seb Hidri went to Tsigereda in order to investigate what took place in that town; they spoke with the attack victims and managed to figure out the details of the attack.

They met one young person who was a coordinator of the meeting and imprisoned due to a false witness.

They met another militia person who was charged with participating in the meeting and was threatened with imprisonment.

- They met a woman who prepared coffee for the meeting participants and who became a victim of imprisonment and physical attack.
- They met an individual whose post as a leader of the Youth League was stripped off by the local administrative cabinet; his crime as charged was that he coordinated the Megabit 22 meeting
- The people spoke that public services are delayed on purpose
- Others said that they were promised town land grants before the meeting, but after the meeting the authorities told them that they will get the lands in the wilderness.

At any rate, they observed that intensive campaign is being undertaken by the authorities in order to frighten and subdue the people who attempted to speak out based on their fundamental rights. This is really a gross violation of the constitution, human as well as democratic rights.
